

## June 2021 Data Release

The Home Purchase Sentiment Index® (HPSI) is a composite index designed to track consumers' housing-related attitudes, intentions, and perceptions, using six questions from the National Housing Survey® (NHS).

### The Home Purchase Sentiment Index

The HPSI fell 0.3 points to 79.7 in June.

### Components of the HPSI

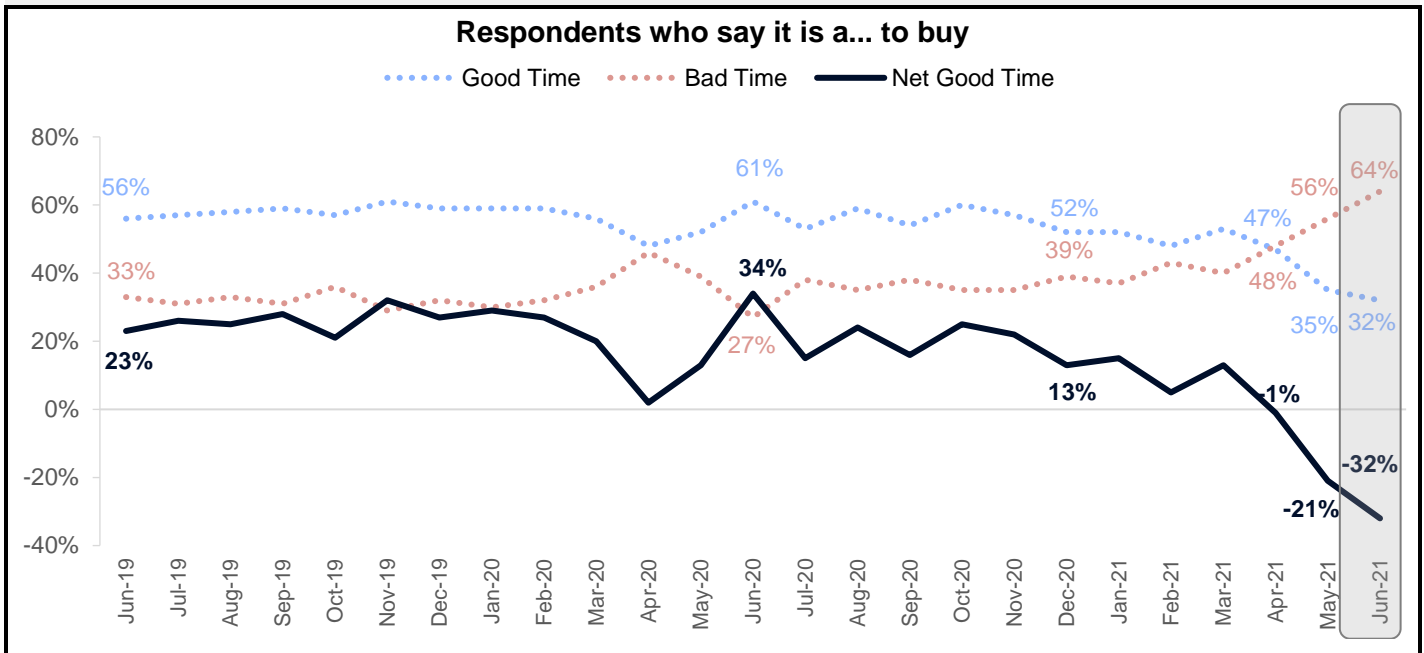

The fall in the HPSI can be attributed to net decreases in four components this month: Buying Conditions, Mortgage Rate Outlook, Home Price Outlook, and Change in Household Income. Two components increased: Selling Conditions and Job Loss Concern.

	June 2021			Net Change	
	Good Time	Bad Time	Net Good Time to Buy	MoM	YoY
<b>Buying Conditions</b>	32%	64%	-32%	-11	-66
<b>Selling Conditions</b>	77%	15%	62%	+20	+69
<b>Home Price Outlook (next 12 months)</b>	48%	21%	27%	-3	+18
<b>Mortgage Rate Outlook (next 12 months)</b>	6%	57%	-51%	-8	-36
<b>Job Loss Concern (next 12 months)</b>	88%	11%	77%	+2	+29
<b>Change in Household Income (past 12 months)</b>	27%	13%	14%	-2	+5

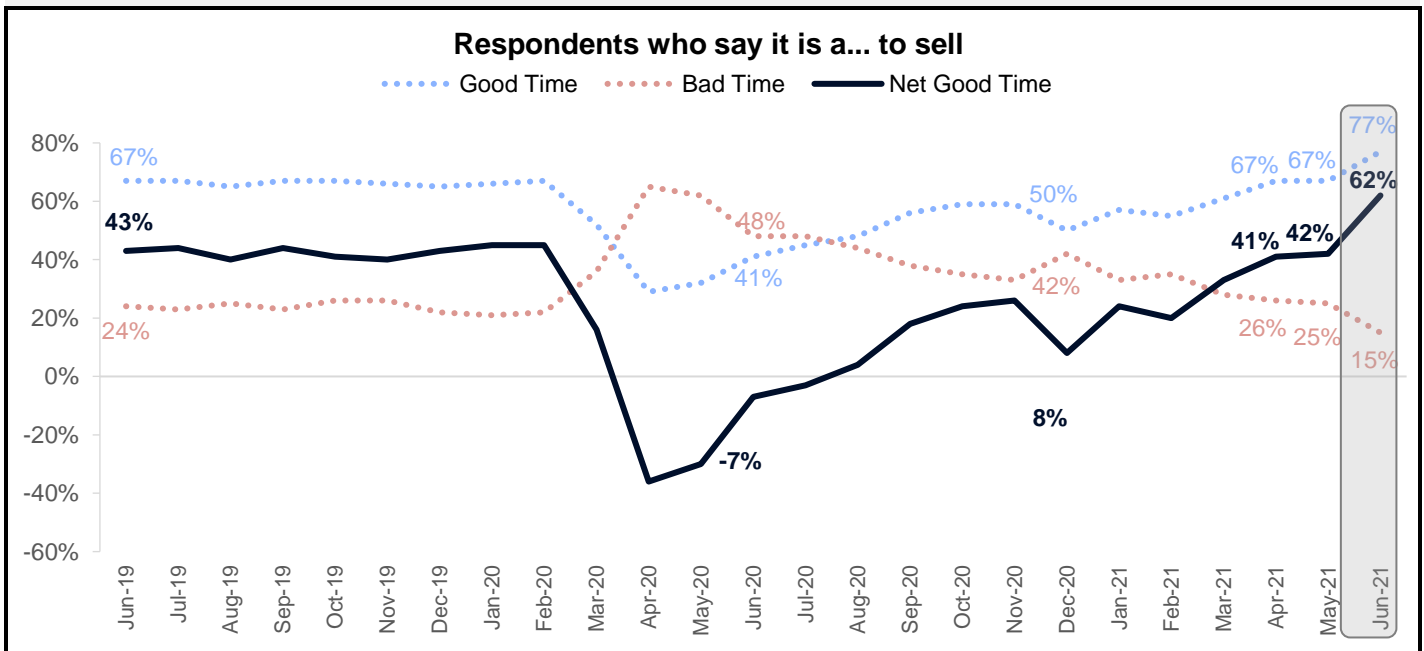

## Components of the HPSI – Good/Bad Time to Buy and Sell a Home

In June, the net share of consumers who say it is a good time to buy fell 11 percentage points, hitting a new survey low of -32%.

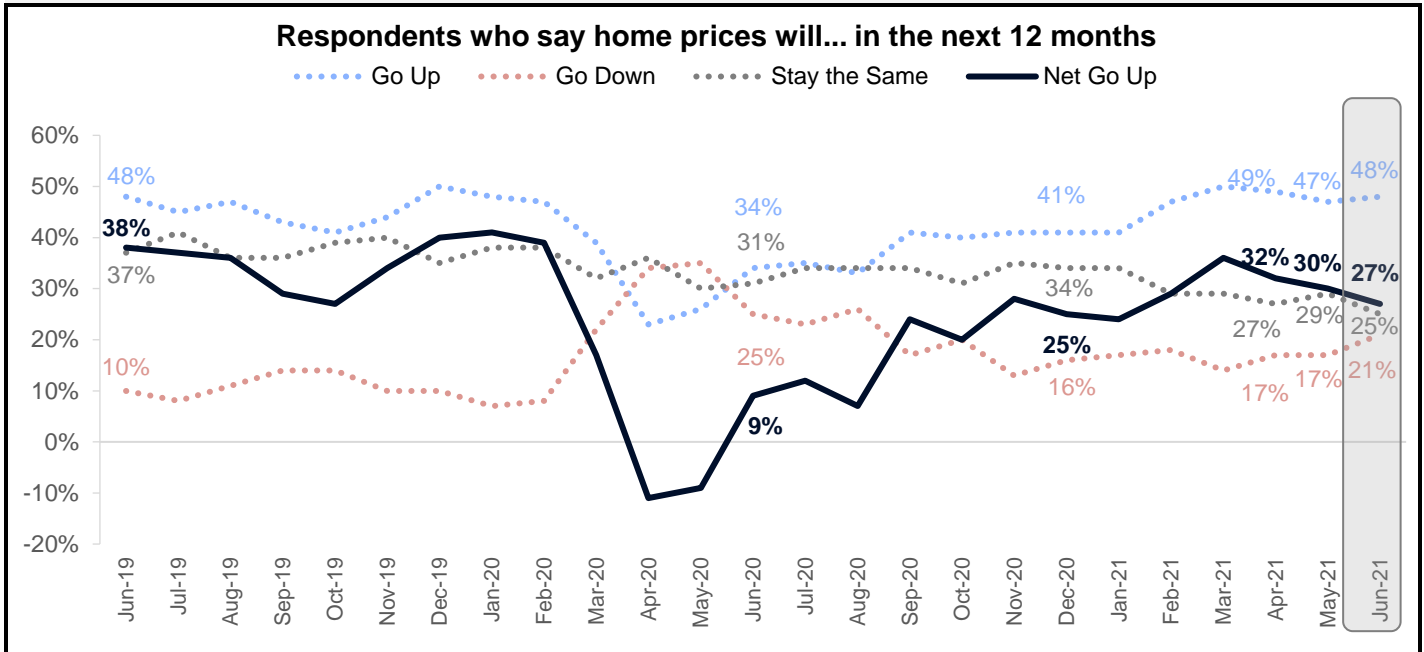

The net percentage of those who say it is a good time to sell increased by 20 percentage points, reaching a new survey high.

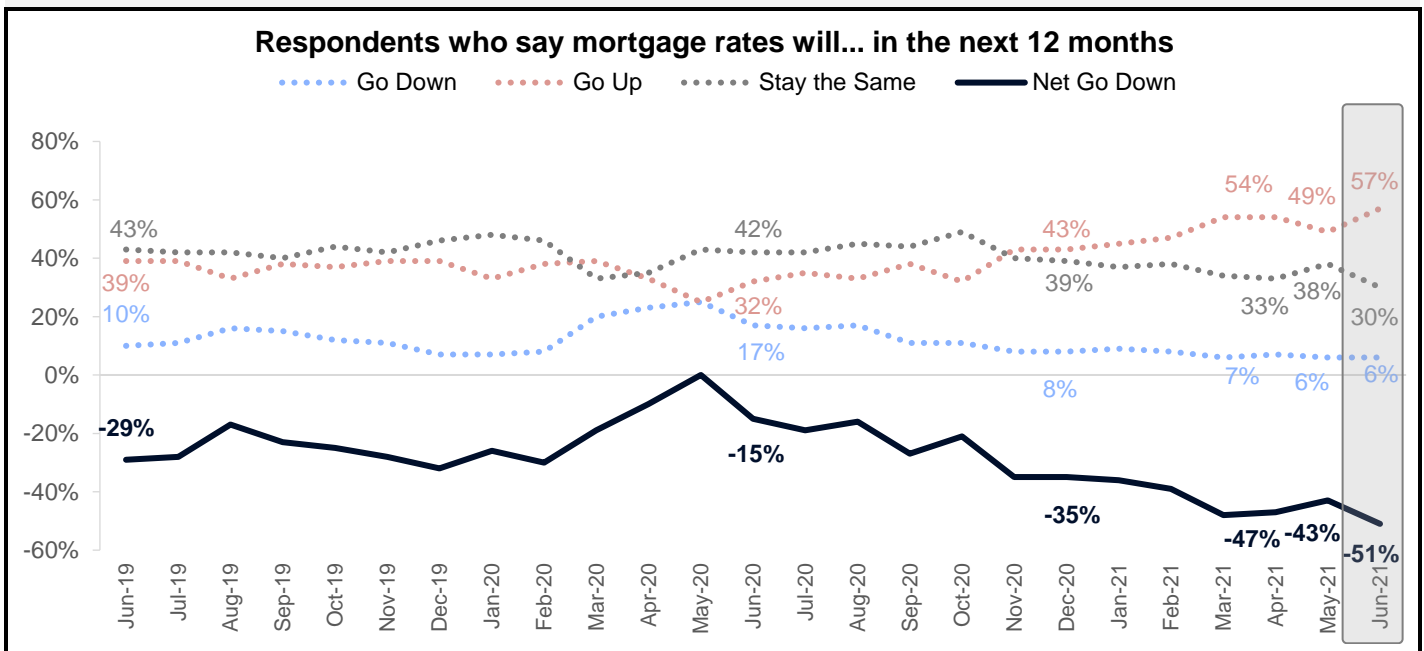

## Components of the HPSI – Home Price and Mortgage Rate Expectations

The net share of consumers who say home prices will go up decreased by 3 percentage points, continuing last month's decline.

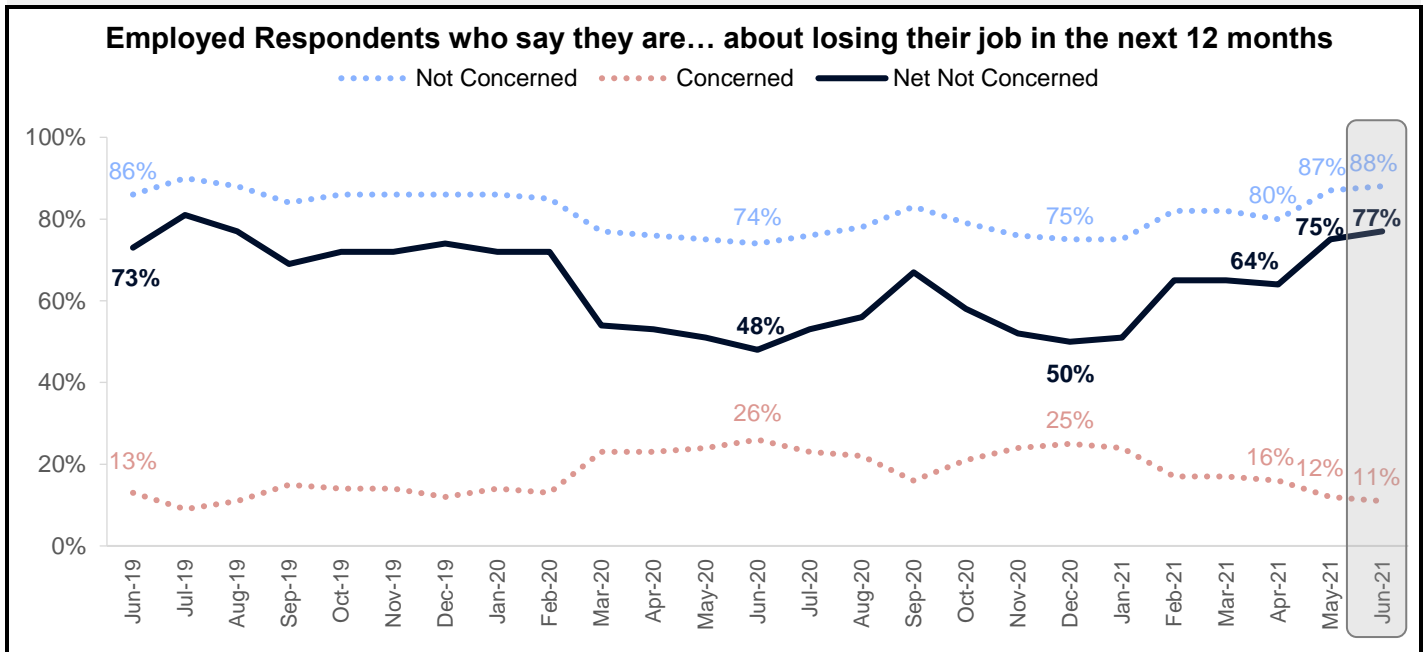

This month, the net share of those who say mortgage rates will go down over the next 12 months fell 8 percentage points to -51%, reversing the increase seen last month.

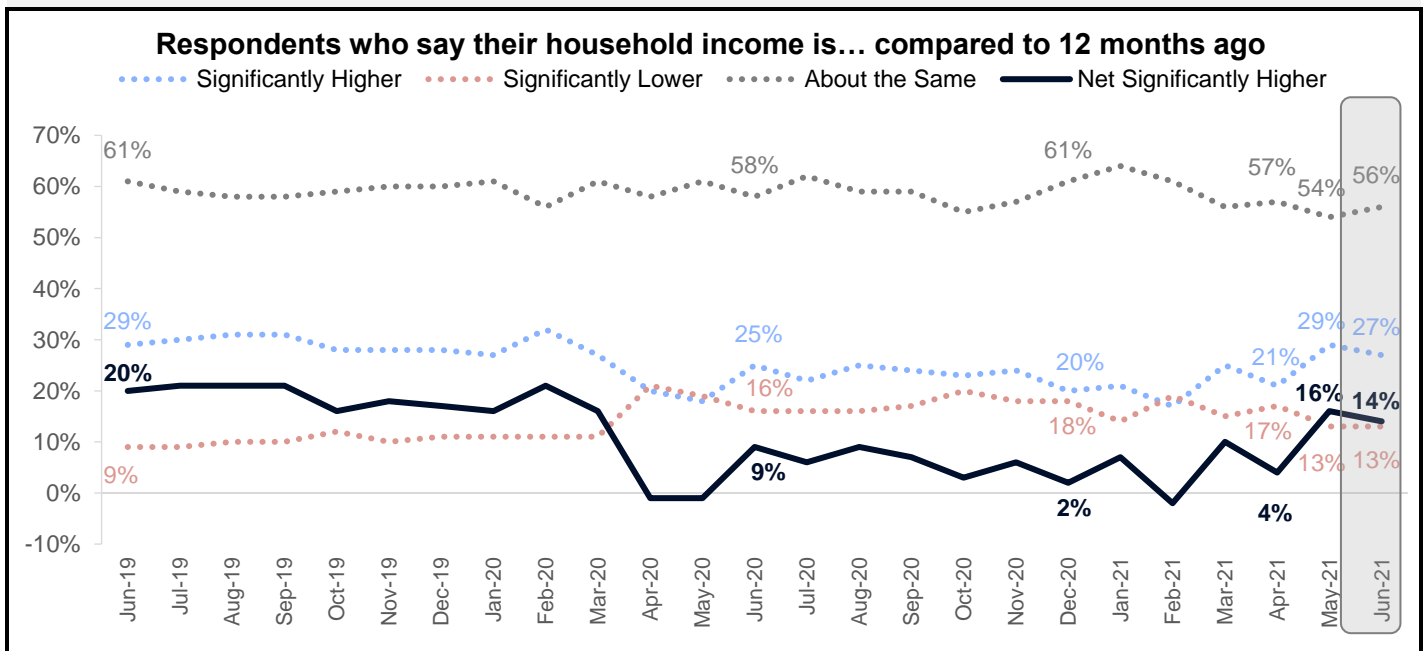

## Components of the HPSI – Job Concerns and Household Incomes

In June, the net share of employed consumers who say they are not concerned about losing their job rose 2 percentage points to 77%, continuing the increase seen last month.

The net share of those who say their household income is significantly higher than it was 12 months ago fell by 2 percentage points to 14%, partially reversing last month's increase.

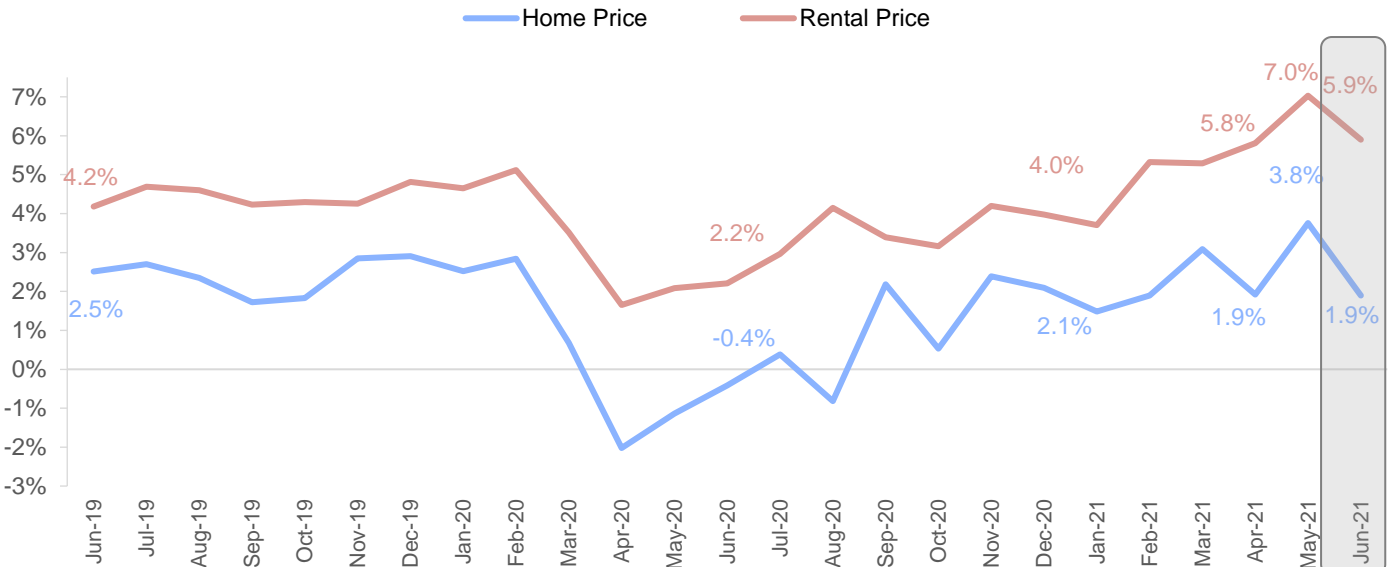

## Additional National Housing Survey Key Indicators

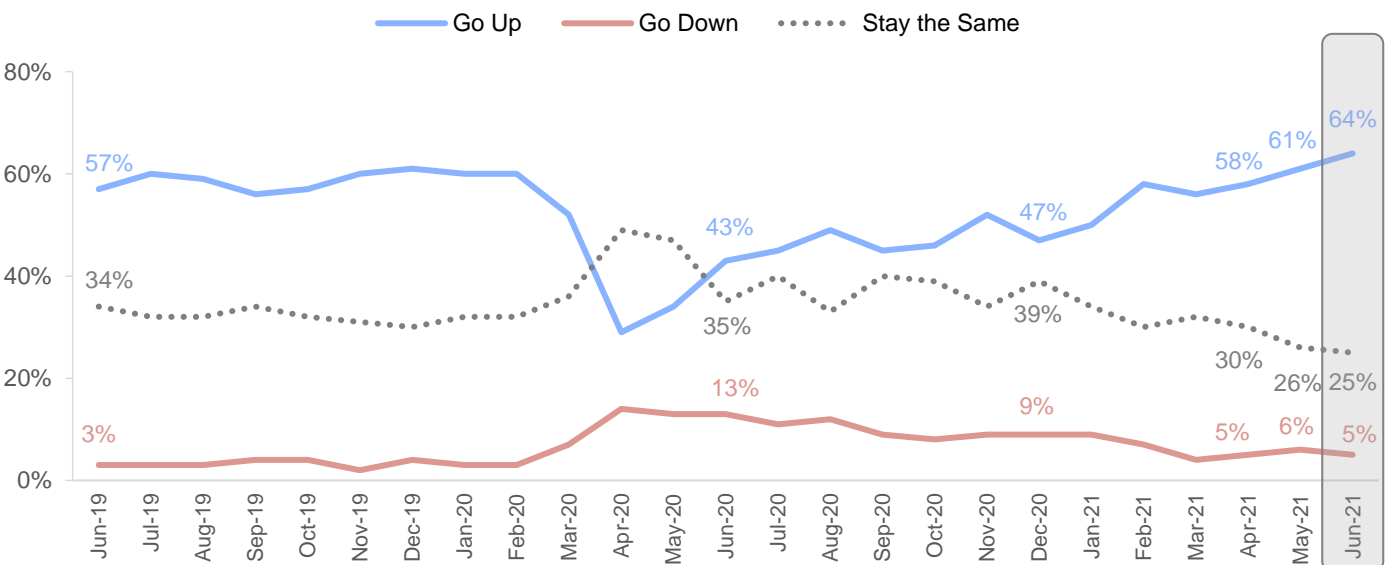

On average, consumers expect rental prices to increase 5.9% over the next 12 months, a 1.1 percentage point decrease from last month's survey high. They expect home prices to increase 1.9% over the next 12 months, a 1.9 percentage point decrease from last month, reversing last month's increase.

### Average Expected Percent Change Over the Next 12 Months

The share of consumers who expect home rental prices to go up increased by 3 percentage points to 64%, and the share who expect home rental prices to go down fell 1 percentage point to 5%.

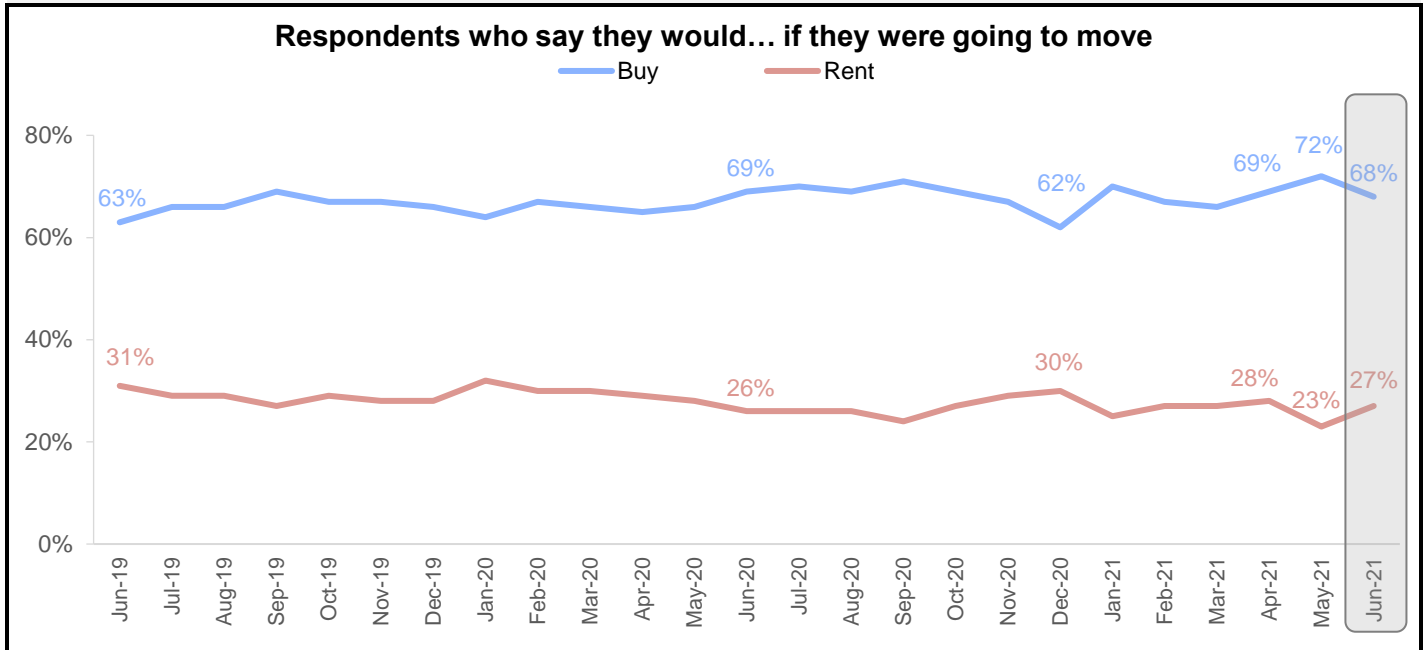

### Respondents who say home rental prices will... in the next 12 months

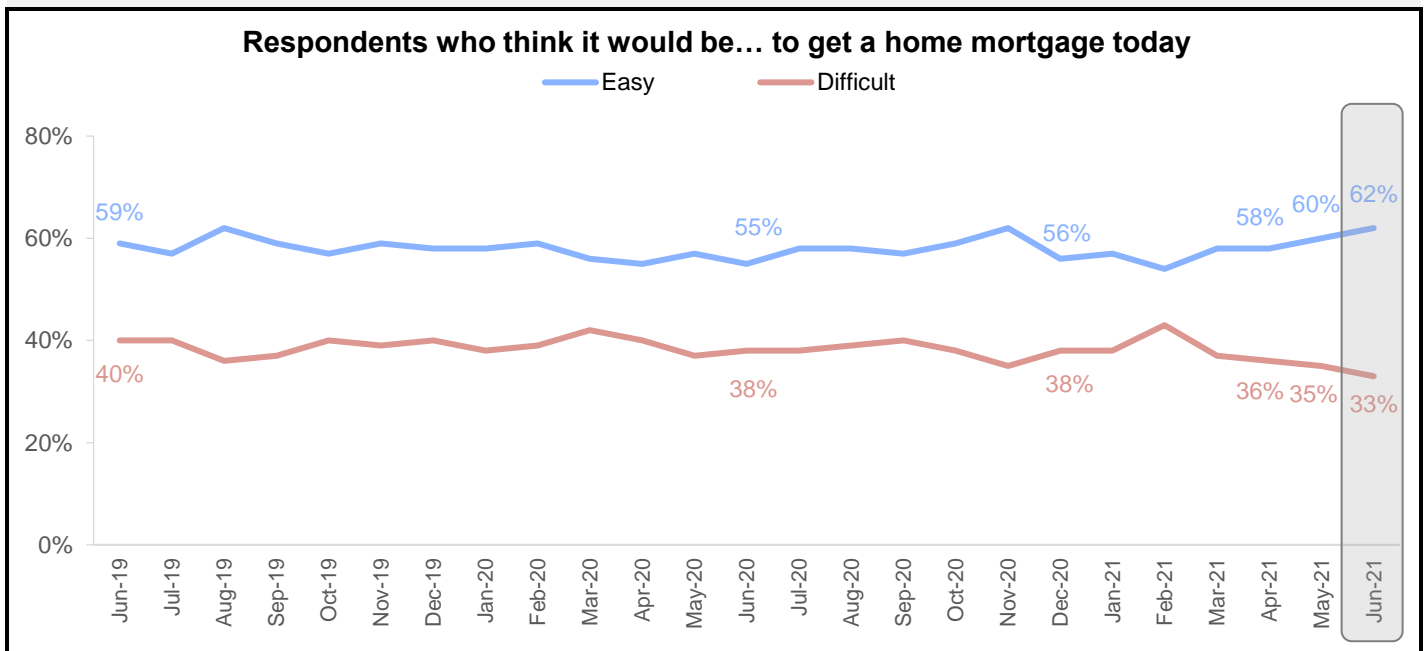

## Additional National Housing Survey Key Indicators

The share of consumers who say they would buy a home if they were going to move fell 4 percentage points from last month's survey high to 68%. The share who say they would rent rose 4 percentage points from last month's survey low to 27%.

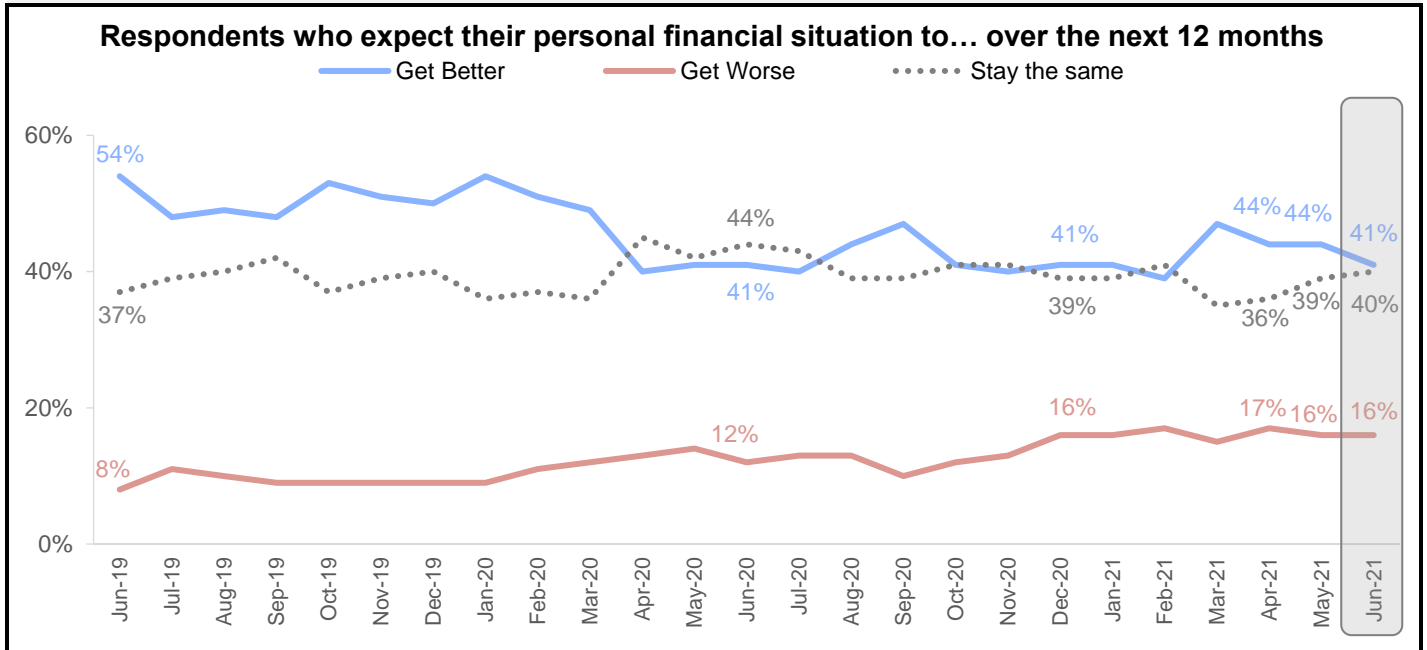

The share of consumers who say getting a mortgage would be easy increased 2 percentage points to 62%, reaching a survey high last seen in November 2020, while the share of those who say it would be difficult fell 2 percentage points to 33%, a new survey low.

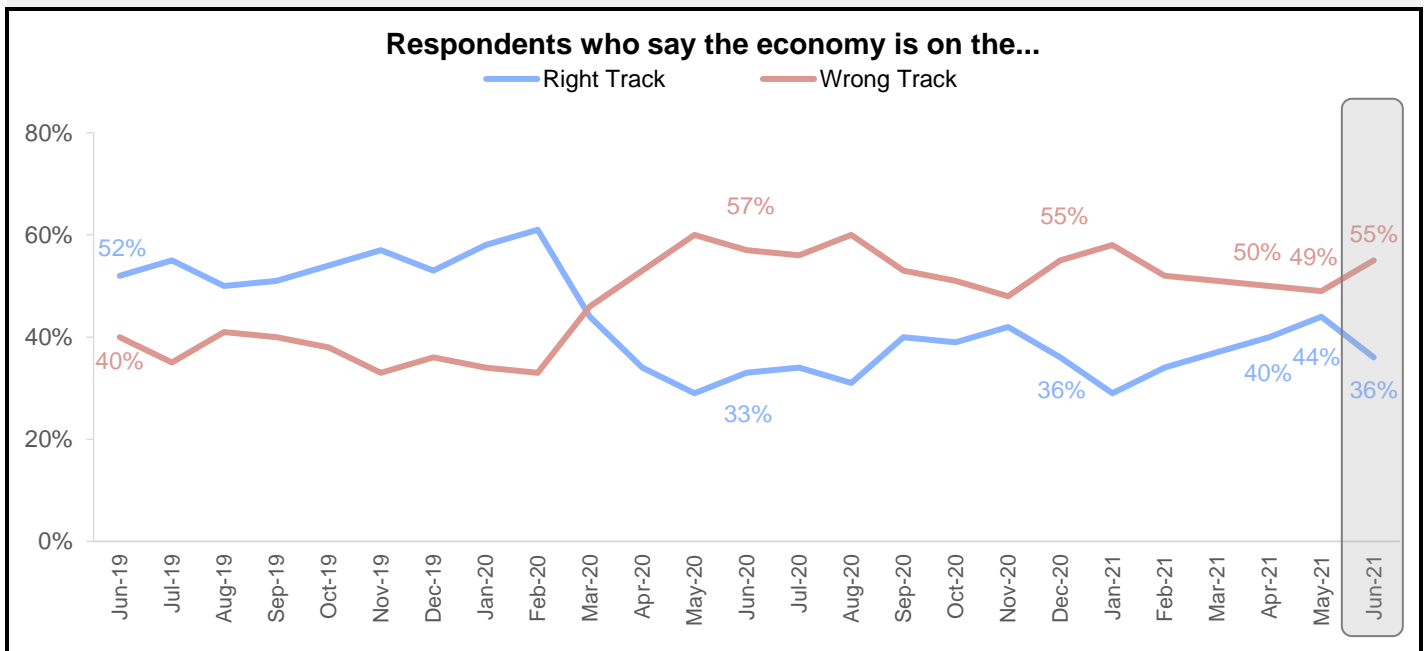

## Additional National Housing Survey Key Indicators

The share of consumers who expect their personal financial situation to get better fell 3 percentage points to 41%, the share who expect it to stay the same rose 1 percentage point to 40%, and the share who expect it to get worse remained at 16%.

Reversing the trend seen over the last several months, the share of consumers in June who say the economy is on the right track fell 8 percentage points to 36% and the share who say it is on the wrong track rose 6 percentage points to 55%.

# The National Housing Survey®

June 2021

## APPENDIX

### About the Survey

The National Housing Survey® polled a nationally representative sample of 1,002 household financial decision makers (margin of error ±3.1%) aged 18 and older between June 1, 2021 and June 24, 2021.

Interviews were conducted by PSB, in coordination with Fannie Mae.

The statistics in this release were estimated from sample surveys and are subject to sampling variability as well as nonsampling error, including bias and variance from response, nonreporting, and undercoverage. Averages of expected price changes were calculated after converting responses of “stay the same” to 0% and after excluding outliers, which were defined to be responses that were more than two standard deviations from the mean.

How the Home Purchase Sentiment Index (HPSI) is Calculated*	
Net Good Time to <b>Buy</b> <i>Very or Somewhat Good Time To Buy – Very or Somewhat Bad Time To Buy</i>	Q12
Net Good Time to <b>Sell</b> <i>Very or Somewhat Good Time To Sell – Very or Somewhat Bad Time To Sell</i>	Q13
Net <b>Home Prices</b> Will Go Up (next 12 months) <i>Home Prices Will Go Up – Home Prices Will Go Down</i>	Q15
Net <b>Mortgage Rates</b> Will Go Down (next 12 months) <i>Mortgage Rates Will Go Down – Mortgage Rates Will Go Up</i>	Q20B
Net Confident About Not Losing <b>Job</b> (next 12 months) <i>Among Employed Respondents, Not at All or Not Very Concerned about Losing Job – Very or Somewhat Concerned about Losing Job</i>	Q112B
Net Household <b>Income</b> is Significantly Higher (past 12 months) <i>Income is Significantly Higher – Income is Significantly Lower</i>	Q116
$HPSI = \frac{Q12 + Q13 + Q15 + Q20B + Q112B + Q116}{6} + 63.5$	
* The HPSI calculation includes the addition of a constant of 63.5 in order to set the index's initial value at 60 as of March 2011, in range with the <b>Index of Consumer Sentiment</b> and the <b>Consumer Confidence Index</b>
